### QUALIFYING MONTH!

You're building up fitness and are entering the riskiest phase of your training. Resist the urge to run too fast or you're likely to get injured.

Use your first marathon as practice for Comrades. Use the same nutrition and race strategy (walk breaks, lubrication, etc). After the race, take note of the chafe areas and blisters so that you can address these areas before the next race.

Remember that training days are interchangeable: if your club has Time Trials (TT) on a Tuesday or Wednesday, you can swap days.

*\*Training Paces: Start at the slower end of the training paces, and moving towards the faster end as you progress. Please note that the time trial and training paces times are a guide.*
